

# Principle Based Periodontal Therapy and Treatment Planning

*Getting Great Results One Patient at a Time!*

*Are you frustrated with a **cookie cutter approach**  
to treating periodontal disease?*

*Want to assist your patients in achieving disease remission?*

*Then **this** is the course for you!*

You will be encouraged by the body of scientific evidence supporting your efforts to diagnose early and treat conservatively. Discover diagnostic techniques and treatment options available to help *you* help your *patients* understand and arrest their periodontal disease.

Utilizing a 'Four Pronged Approach' encompasses treating from the top down, bottom up, inside out, and the outside in. This approach provides the tools to create a comprehensive periodontal treatment plan without *over* treating or *under* treating. This new perspective will help your patients get their periodontal disease under control, reduce overall systemic inflammation and live healthier lives because of your efforts.
