Is Your Practice Management Software a Team Player?

Make It Work for YOU!

Feeling inadequate or *fighting a losing battle* with your dental software?

✓ *Inadequate or time consuming clinical notes*

✓ *Nondiagnostic images*

✓ *Incomplete or inaccurate charting*

✓ *System feels like a foreign language*

You're not alone. Many clinicians struggle with their software and new technologies in practicing dentistry. With 30+ years' experience in dentistry, **Jamie Marboe, RDH, BS**, (*past Certified Eaglesoft Trainer*) shares solutions that **unlock the potential of your software**, enabling greater knowledge/efficiency and ultimately improving patient care.

Learn some of the unknown or under-utilized areas where customization can make the software work more efficiently for you, such as clinical note templates, probing and charting paths, image templates, "quick pick" buttons, bundled service codes, common insurance claim notes, etc. Discern key time management concepts for improving accuracy and efficiency. Discover a reporting system which pulls information that can be used to improve patient management and practice profitability.
